

HERE, WE ELIMINATE VIRUSES THANKS TO CZECH NANOTECHNOLOGY

The only maintenance-free air purifier on the market combining the most modern technology of photocatalysis and UVA + UVC rays

Why Nano Flow new generation?

It works continuously in the **presence of people** and thus reduces the risk of virus transmission via aerosol and possible **viral load**

Direct decomposition of viruses, bacteria, carcinogenic substances, etc., not mere capture or killing

High efficiency thanks to the combination of the latest **photocatalysis** technology (solgel) and **UVA + UVC** radiation

High performance up to **250 m³ / hr**

Without the need to change and buy additional filters, i.e. **zero operating costs and maintenance.**

Design hanging version or **mobile** version

Czech product and Czech know-how
